

NEW REQUIREMENTS FOR FINGERPRINTS

A recent bill, House Bill 165, mandated some changes in our background screening requirements. It requires new providers with initial licenses and certificates issued after June 30, 2013 to submit fingerprints and a \$36.50 fingerprint processing fee with all background screening forms, not just those for individuals who have not lived in Utah for the past 5 years.

This means if you are a center provider and you open a new facility after June 30, 2013, you will need to submit fingerprints and fingerprint processing fees with all required background screening forms.

This also means that if you are a home provider and you move after June 30, 2013, you will need to submit fingerprints and fingerprint processing fees with all required background screening forms for individuals age 18 and older.
